Supporting schools to provide inclusive education

Learning 4 All provides professional consultancy services for staff working in mainstream schools, special units, special classes and special schools and the broader community. We specialise in education, special learning needs and disability professional consultancy.

In addition to an extensive professional learning calendar, we provide tailored workshops and information sessions that are designed to meet the specific needs of educational settings. The hourly rate for this service is \$193.99 (NDIS rate) plus travel.

For this tailored service to be most effective for schools, a 3 hour on site visit is ideal. The consultant is then able to conduct observations in the classroom as well as meet with the student's teacher and support staff. This meeting is an opportunity to discuss areas of concern, provide strategies and assist with curriculum planning.

Total cost for 3 hours is \$581.97 plus travel.

School Consultancy Services

EDUCATION CONSULTANCY SERVICES

A TAILORED CONSULTANCY PACKAGE CAN SUPPORT SCHOOLS WITH:

Curriculum planning, development and implementation support

- Individual Education Plans (IEPs, NEPs, One Plan)
- Attend planning and team meetings
- Assist with the development of clear implementation strategies and measurable progress indicators

Transition to school

- Identify key considerations to ensure success transition
- Develop a plan to address and support student needs
- Liaise with both settings and schooling sector personnel and attend transition meetings

Individually designed programs for teachers and support staff to model and support

- Student goal setting
- Behaviour and intervention
- Management of environment changes
- Introduction of visual systems and augmentative communication methods
- Provision and development of resources and teaching strategies
- Curriculum planning
- Collaborative team approach

Targeted consultation for leadership and support teams to

- Develop and implement behaviour plans
- Support inclusive practices
- Liaise with allied health professionals to foster a collaborative approach
- Facilitate teacher training to support the special learning needs of individual students
- Identify areas of concern, assist with problem solving and identify practical strategies
- Understand the NDIS and how it relates to the student and the school
